AggieShip

Our New Outbound Shipping System!

Kaitlyn McLane

What is it?

- UC Davis's new outbound shipping system
- Replacement for the legacy FedEx intranet system
- Offers more shipping options, services, and couriers

Benefits

- Meets Shipping Regulations
- Utilizes University Agreements
- Compatible with current IT standards
- Automatic invoicing

Courier & Shipment Type Options

Couriers

- FedEx
- UPS
- DHL (international only)

Shipping Options

- International books and documents (training required)
- Hazardous Materials: GMO/GMMO, Dry Ice, Cat B. (training required)
- Other international shipments (require Mail division review)

Mode Optimization

When generating shipments, the **delivery date** is indicated instead of a service.

The system will return all available services that will get your shipment to it's destination by the desired delivery date.

The most cost effective choice will default, but can be edited if desired.

Let's check out AggieShip!
