CORNING

Go Green with Corning

Looking to stock your lab with sustainable labware? Corning Life Sciences can help. Below are a few of our environmentally friendly lab tools that can help you eliminate hazardous chemical use, minimize landfill waste, reduce water usage, and more. For additional information, contact your Corning Life Sciences representative.

Eliminate IPA with Corning® CoolCell®

Corning CoolCell alcohol-free freezing containers are better for the environment—and your cells. They provide reproducible, controlled-rate freezing with no IPA or hazardous waste disposal.

Cat. No.	Description	Capacity (mls)	Exposed Vol (µl)	Qty/Pk	Qty/Cs
432000	CoolCell, purple	12	No	1	1
432001	CoolCell LX, purple	12	Yes	1	1
432002	CoolCell LX, green	12	Yes	1	1
432003	CoolCell LX, orange	12	Yes	1	1
432004	CoolCell LX, pink	12	Yes	1	1
432005	CoolCell 5 ml LX, purple	12	Yes	1	1
432006	CoolCell FTS30, purple	30	Yes	1	1
432007	CoolCell FTS30, orange	30	Yes	1	1
432008	CoolCell FTS30, green	30	Yes	1	1
432009	CoolCell FTS30, pink	30	Yes	1	1

Lower Water Usage with Ice-free Sample Cooling Solutions

In many drought-stricken parts of the U.S., water usage is a key environmental concern. Reusable Corning CoolBox® and CoolTrack® systems provide controlled rate cooling without the need for ice.

Cat. No.	Description	Contents	Qty/Pk	Qty/Cs
432014	XT Starter, complete, purple	XT Holder and XT Cooling Core	1	1
432015	XT Starter, holder only, purple	XT Starter Holder only	1	1
432016	XT Starter PCR96 system	XT Starter and CoolTrack XT PCR96	1	1
432017	XT Starter M-PCR system	XT Starter and CoolTrack XT M-PCR	1	1

Reduce Plastic Waste with Gosselin™ Petri Dishes

Gosselin 100 x 15 mm Petri dishes are manufactured with 10% less plastic resin than other Petri dishes. In addition, the Petri dish sleeves are fully recyclable.

Cat. No.	Description	Qty/Pk	Qty/Cs
89445-01	100 x 15 mm stackable Petri dish, sterile	25	500
89444-01	100 x 15 mm slippable Petri dish, sterile	25	500

Throw Away Less Flasks with Falcon® Multi-Flasks

Three- or five-layer Multi-Flasks have the same surface area as three or five T-175 flasks, so you generate less waste while saving valuable incubator space.

Cat. No.	Description	Qty/Pk	Qty/Cs
353143	3-layer, straight neck with vented cap, 525 cm ²	2	12
353144	5-layer, straight neck with vented cap, 875 cm ²	1	8

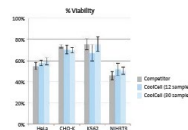

Go Alcohol-free and Eliminate Ongoing Costs with IPA-free Corning® CoolCell Freezing Systems

CORNING

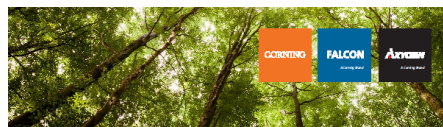

Many labs use isopropanol (IPA) containers for cryogenic freezing, but they require costly alcohol replacements every 5 uses, can be cumbersome to handle, and may have inconsistent freezing rates.

Corning CoolCell is a reusable system that uniformly freezes your cells without the mess and cost of IPA. With CoolCell containers, you can depend on high reproducibility and high cell viability to ensure you preserve the most cells possible for your research.

HEK2, CHO-K1, K562, NIH3T3, Corning CoolCell 12-well, CoolCell 7200 20-well, or suspension freezing containers were used for these four cell lines. Identical inoculation efficiencies and viabilities were observed after thawing.

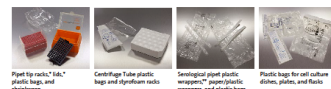

You can make a difference. Recycle your packaging!

Don't throw away your Corning®, Falcon®, or Axxygen™ product packaging. Recycle it through Corning's package recycle program.

At Corning, we believe that protecting the environment makes good business sense. We are committed to protecting the environment through continuous improvement of our processes, products, and services. In 2014, Corning was named an ENR® STAR® Partner of the Year, one of the Environmental Protection Agency's most prestigious honors. It's our desire to empower our customers' research while being good stewards of the environment. With this goal in mind, we offer select customers free participation in our packaging recycling program.

Protecting the environment by using Corning's brands and recycling program is as simple as 1 2 3

Step 1 Place the plastic packaging from the listed Corning, Corning®, Falcon®, or Axxygen products in a box. (Pack the box tight; we pay the recycle by the box. There is no charge to you.)

Please note: Items not allowed for recycling:

- No actual products, biohazard materials, liquids, radioactive waste, or regulated waste of any kind.
- No packaging from biologically coated products (Corning BIOCOUT™, Corning Matrigel®, etc.).
- No cardboard/corrugated boxes.
- No packaging materials from other manufacturers, because Corning pays a fee per box, please only recycle plastic packaging from Corning's brands (Corning, Falcon, and Axxygen). Packaging from other brands will be returned to customers at their own expense.

Buy 1 Corning® CoolBox™ XT or 2XT and get an Accessory Free
See redemption details on back.

Are you looking for an ice-free solution to keep your samples consistently cold while you work? Then take a closer look at the Corning CoolBox, a benchtop cooling system that provides sample cooling or freezing without ice, electricity, or batteries.

Corning CoolBox

- Allows all-day cooling (up to 16 hours) or freezing (up to 8 hours)
- Removes the need for trips to the ice machine, reducing risk of ice contamination
- Accommodates a wide array of sample tubes and plates when coupled with a Corning CoolTrack®
- Is available in single- or double-capacity systems for a variety of applications
- May be used with dry ice to create a compact, portable, snap-freezing workstation for bacteria, viruses, or proteins

Buy a Corning CoolBox XT or 2XT System...

Other Systems Cat. No.	Corning Cat. No.	Description	Quantity	Qty/Cs
87-210-021	432021	CoolBox XT, purple	Holder and one Cooling Core	1
87-210-022	432022	CoolBox XT, green	Holder and one Cooling Core	1
